INDUSTRIAL ACTIVITIES

Fiscal Year 1913 Indicates a Big Increase Over 1912 in Manufactures Imports and Exports of the United States — Exceeds the Former Record Year

Washington, D. C., Aug. 6.—Industrial and commercial activities in the United States at the close of the fiscal year 1913 are indicated by the latest figures of the bureau of foreign and domestic commerce, department of commerce, which show imports of manufactures and agricultural products, movements of manufacturers' materials within the United States, activities of transporting agencies, and the supply and distribution of currency at the latest available dates. In practically all of these figures of the fiscal year 1913 exceed those of the former high record year, 1912. Imports of raw materials for use in the manufacturing industries exceed those of 1913 by 77 million dollars and imports of manufactures for further use in manufacturing exceed those of 1912 by 167 million dollars. Cotton, silk, fibers, tobacco, hides, lumber, copper, pig iron and chemicals used in manufacturing, all show increases in the quantity imported in 1913, compared with 1912; while in the other principal manufacturers' materials, such as wool, rubber, tin, and iron ore, the figures of 1913 differ but little from those of 1912. The total value of all imports for the year was \$1,812,873,234, against \$1,653,364,934 in 1912, and of exports \$2,465,884,149 against \$2,204,322,409 in 1912.

These increases in the inward movements of manufacturers' materials in 1913, when compared with the former high record year, 1912, seem to indicate a general activity in the industrial interests, and this view is supported by figures relating to domestic movements of manufacturers' materials. The eastward movements of iron ore through the Soo canal, from the opening of navigation on the lakes to July 1, 1913, as shown by the monthly reports of the general superintendent of the canal, aggregated 15 1/4 million tons against 13 1/4 million in the same period of 1912, and 8 1/4 million in the like period of 1911. The wheat movements through the canal were 53 1/2 million bushels against 47 1/2 million in the same period of last year; other grain, 33 million bushels against 18 1/2 million; flour, 2 1/2 million barrels against 2 million; and all freights, 18 1/4 million short tons against 15 1/3 million in the same period of last year; while west bound freights through the canal were 7 million tons against 4 1/2 million in the same period of last year.

Logan, Aug. 6.—Another farm demonstrator has been appointed to supplement those already in the field. He is Lorin A. Merrill of Logan, and his field is to be Sevier county, where he has gone to make his residence. Appointment of these state agricultural specialists was authorized by the recent legislature.

Mr. Merrill graduated from the Utah Agricultural college in 1896, then for some time became assistant dairyman in that institution. Later he had charge of creameries and was engaged in practical dairying in Murray and Richmond, Utah. Yielding to the attraction of the soil, he bought a farm and engaged in fruit-growing. He has been bishop of the Logan Seventh ward for seven years, a position he resigns to go down into "Dixie."

WILL PAY FOR GOOD ROADS.
Brigham City, Aug. 6.—The county commissioners, in company with members of the state road commission, made a trip of inspection over the new road now in course of construction between South Willard and this city. Most of the money originally appropriated for this road has been used, but Box Elder county concluded to complete the road, and will make an additional appropriation of about \$500 to meet the requirements on this piece of road.

PROWLERS IN PROVO ESCAPE GUN FIRE.
Provo, Aug. 6.—Night prowlers on the block where Albert S. Jones has his grocery store in the First ward succeeded in arousing the people of the neighborhood last night. Several shots were fired and the police made two trips to the disturbed district, but without making any arrests. About 12 o'clock some one was noticed on the outside by persons in John E. Taylor's home, the old Pratt house. One of Mr. Taylor's sons fired and a man was seen to run from the block through the east side. Whether or not he was wounded is a matter of doubt, but if he was badly frightened, judging from his speed and the queer noises he made. The officers were called, but decided it was no use to look further.

About an hour later there were four shots fired on the west side of the block, which again called the people of the vicinity to the doors. The shots had been fired by John W. Guy at a man who was emerging from the lot, and who refused to stop when Mr. Guy halted him, but instead ran back into the lot in a large patch of corn. Mr. Guy had to go into the house for more ammunition, and when he again came out he and the neighbors who had attracted him, Chief of Police Giles and Officer Jonas Collins, who had again gone to the trouble zone, made a thorough search of the block, but the man had escaped, or was so successfully hidden that he was not discovered. Officer Collins came near being shot while running down the sidewalk in response to a call of "here he is" from an excited citizen who mistook a big dog coming out of the corn for the man seen by Mr. Guy. When others came in response to the call Collins was seen running, and if he had not vigorously asserted his identity and registered an objection against being sacrificed, the guns of the posse which were already aimed at him would have been discharged.

"NIAGARA" AT MILWAUKEE.
Milwaukee, Wis., Aug. 5.—The Perry flag ship Niagara, with her escort, was given a great ovation on her arrival in Milwaukee today. Today's program included a reception and luncheon for the Perry guests, and in the afternoon a red, white and blue automobile parade.

SURVEYING NEW ROAD

Foreign Capital Is Said to Be Back of Uintah Road From Green River to Roosevelt — Work Will Be Rushed by Engineers

Roosevelt, Aug. 6.—A railroad into the Uintah basin from Green River city is the talk of this place today. Baron Von Horst of London, purchaser of several thousand acres of land near Roosevelt, is behind the railroad move.

Ed F. Harmstrom of Roosevelt, one of the most experienced engineers of the West, has been called to proceed at once with a preliminary survey and general reconnaissance of the route along the Green river from Green River to Ouray, Utah county. If Mr. Harmstrom's report is favorable Baron Von Horst promises to bring European capital to give the Uintah basin a railroad at once, the terminal in the basin to be temporarily at Roosevelt.

The Harmstrom party equipped with all necessary instruments and a host left for Green River today. The members of the party are Chief Engineer Ed F. Harmstrom, Assistant Engineer A. C. Harmstrom, Neil Hanks, Hank Stewart and C. C. Larson, formerly a sailor of twenty-five years' experience, who will have charge of the boat that carries the engineering party down the rapids of the river to Green River.

It is expected that several weeks will be required to make the trip, and in the opinion of Neil Hanks, who has made two trips down the Green, the report to Baron Von Horst will be favorable.

Local interest is running high in the success of the Harmstrom party. Advances from London are to the effect that moneyed friends will visit the Uintah basin September 18, 19 and 20, the dates of the joint fair of Uintah and Wasatch counties at Fort Duchesne. Should the Harmstrom engineering party report on the proposed route be favorable the baron and his party will then go over it and railroad operations may follow.

It is understood that Western connections for this road are being sought at Salt Lake.

VETERANS ARE TO HAVE AN OUTING

Complete arrangements for their annual outing were made last night when the Veteran Firemen met and went over all details. The outing will be held at the Hermitage and an excellent program has been arranged. There will be sports, athletic events, and the feature will be the "old time" dances to the old favorite tunes.

Among the Veteran Firemen who will participate are the following: Hyrum Goodale, F. R. Walker, Thomas Newey, J. R. Horspool, J. W. Browning, Joseph Wood, William West, F. H. Whitehead, H. W. Shurtliff, Joseph Pingree, Jr., John C. West, Alfred Babbitt, J. R. Paine, T. J. Paine, R. B. Paine, H. D. Gale, H. E. Gale, John Ford, J. McGowen, Ben Chapple, W. G. Chapple, George Treseder, Albert Allen, George Greenwell, W. G. Wright, Ed Mann, J. K. Wright, Aaron McIntyre, Thomas Smurthwaite, John Douglas, Samuel Jost, Felix Sulley, J. A. Stephens, William Yeger, James Harrop, S. W. Jarman, and Ed Reider.

SAYS ODIN JOHNSON'S BRAIN BECAME NUMB

Cincinnati, Aug. 5.—That the brain of Odin Johnson, the Salt Lake City motorcycle racer, who, with nine other persons, was killed at the Ludlow Lagoon motordrome last Wednesday evening, had become numb owing to the excessive speed at which he was racing, was the opinion of Dr. J. J. Malloy, one of the witnesses in the trial of the three promoters today.

Dr. Malloy testified that high speed has a tendency to affect the brain and the rider becomes confused and loses control of the machine. Manager Wilber of the Ludlow Lagoon and J. H. Rush, manager of the motorcycle league, were exonerated from all blame by Judge Lee, and the charge of involuntary manslaughter was dismissed, although Manager Elgerhardt of the motordrome was refused dismissal on the same charge and the taking of testimony in the preliminary hearing was continued.

Several witnesses testified that Johnson threw all caution to the wind when he sought to overtake the other riders. Others declared the wire guard screen was not sufficient to hold the machines on the track.

Fear is expressed by relatives of Mrs. Josephine Patterson, widow of one of the victims, that she may end her life.

CHANGE IS PROBABLE.
Brigham City, Aug. 5.—There is a probability of County Superintendent of Schools D. C. Jensen severing his connection with the Box Elder schools before the beginning of another school year. For some time past the University of Utah has endeavored to procure the services of Mr. Jensen, and it now looks as though the university has been successful. The board of education regrets to have Mr. Jensen's resignation to handle, and will use influence to induce him to stay. Mr. Jensen came here from Logan last summer and filled the vacancy caused by the resignation of Prof. Henry Petersen, who went to Ogden to take the principalship of the Ogden High school, and he is regarded as one of the foremost educators of the state. A number of capable men from out of the county have already made application for this position in the event that Mr. Jensen resigns.

The postal savings bank has had the effect of decreasing the amounts heretofore sent abroad.

OGDEN MAN SAYS HE IS WELL PLEASED

Well-Known Ogdenite Tells of the Benefits Derived From Plant Juice.

"I was just simply all run down," said Mr. Venters, whose residence is at 2758 Lincoln avenue, this city. "When I started taking Plant Juice I could not eat, sleep or work; I was simply run down, but I want to tell you I am all right now; it has built me up and I am in fine shape. I have the best appetite I have had for a long time; sleep like a child and in fact I am improved in every way."

Mr. Venters, who has lived here the greater portion of 14 years and who is widely known in our city, is just another of the thousands of Utah people who have been helped by the use of Plant Juice, the great, new tonic. Plant Juice is the greatest herbal tonic of the age. It tones up the entire system, giving one new vigor and health in a remarkably short time. It is second to none for the treatment of nervousness, headache, dyspepsia, sluggish liver, dizziness, in fact, all cases caused from a run-down system. Plant Juice is for sale at McIntyre Drug Store, 2121 Washington avenue.

AMALGAMATED SUGAR CO.

SUGAR IMPORTS FOR 12 MONTHS

Washington, Aug. 6.—More sugar was brought into continental United States in the fiscal year just ended than in any other year in the history of the country, according to the latest figures of the bureau of foreign and domestic commerce, department of commerce. The quantity of sugar entering from foreign countries and our own islands in the year ended June 30, 1913, was 6 1/2 billion pounds and exceeded by 500 million pounds the figures of the former high-record year, 1912, when the imports from foreign countries and the islands were, in round terms, 6 billion pounds. Of the 6 1/2 billion pounds brought in during 1913, 4 1/3 billion came from Cuba, 1 billion from Hawaii, three-quarters of a billion from Porto Rico, nearly a quarter of a billion from the Philippines, and the remainder chiefly from South America. Java, which has in some years sent us as much as 1 billion pounds of sugar, sent but 13 million pounds in 1913, while the quantity from Europe, chiefly beet sugar, was 182 million pounds, against but 6 1/2 million in 1912, but being materially less than in certain earlier years, the total quantity of beet sugar imported in 1913 having been 908,682,078 pounds, and in 1897, 1,865,567,495 pounds.

In value, however, the year's receipts of sugar fell nearly 30 million dollars below those of last year, despite the fact that the quantity received was 500 million pounds greater. The total value of sugar imported from foreign countries during the fiscal year 1913 was 104,639,823; and of

that coming from Hawaii, \$36,607,820; from Porto Rico, \$26,619,158; and from the Philippines, \$4,593,199; the latter, however, being included in the figures of imports from foreign countries. The average value per pound of the sugar imported from foreign countries in the fiscal year 1913 was 2.2 cents, against 2.81 cents in 1912, 2.46 cents in 1911, and 2.6 cents in 1910.

These figures, which show that the sugar imported in 1913 exceeded that of any other year, suggest that the sugar consumption of the United States in 1913 will be larger than ever before and will, for the first time, exceed 8 billion pounds. The quantity brought from foreign countries is about 4 1/3 billion pounds, and from Hawaii and Porto Rico nearly 2 billion, while the domestic production now approximates 2 billion pounds, the figures for 1912 being, of beet sugar about 1200 million pounds, and of cane sugar, 724 million pounds. Speaking in very round terms, it may be said that foreign countries supply approximately one-half of the sugar consumed in the United States, our own islands about one-fourth, and our own fields about one-fourth. Cuba supplied nine-tenths of that from abroad; Hawaii, about one-half of that from our islands; and beets, nearly two-thirds of that produced at home.

Sugar from Cuba makes its highest record in 1913, 4,311,744,043 pounds against 3,509,657,596 pounds in the former high-record year, 1910, while that from the Dutch East Indies (principally Java) makes its lowest record in many years, being but 12,759,756 pounds, against 340,396,410 pounds in 1912, 916,858,331 pounds in 1909, and 1,182,202,854 pounds in 1900.

Figures indicate that the United States is clearly at the head of the list of sugar-consuming countries, the figures of the current year suggesting a consumption of more than 8 billion pounds while the latest available figures indicate a consumption in India of about 6 billion pounds, in Great Britain over 3 1/4 billion, Russia 3 billion, and Germany 2 3/4 billion pounds.

UTAHN HURT WHEN TRAIN HITS AUTO.

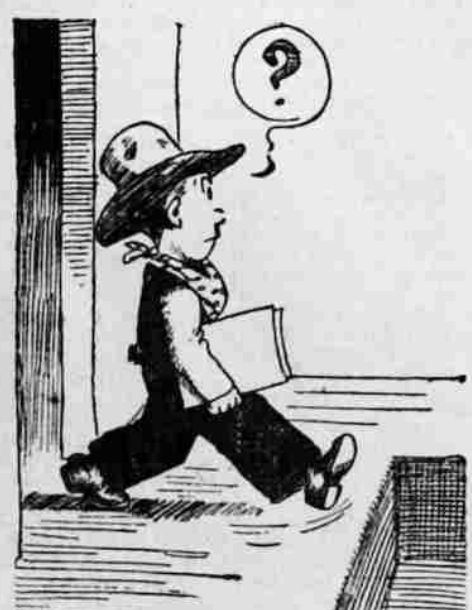

Atchison, Kan., Aug. 6.—A man giving his name as George Wetzels, living near Farmington, Utah, formerly of Concordia, Kan., was seriously injured here yesterday while automobile riding with his brother, Gustav Wetzels, of Atchison.

The auto crossed the Burlington tracks near a cut north of the city and the Wetzels did not see the approaching freight train until too late. The train, going about ten miles an hour up a steep grade, struck the rear end of the auto, swinging it around in such a way that the car side-swiped the train, which stopped almost immediately.

The side of the car was torn off and George Wetzels was thrown against the train, fracturing his skull. He fell between the train and the auto. His right arm was cut off. His brother was uninjured. Engineer Cunningham declares he whistled for the crossing, but the autoists deny this. Wetzels will recover. He says he will sue the Burlington for \$25,000.

TROUT COMPANY PROSPERS.

Provo, Aug. 6.—The Rainbow Trout company held its annual meeting here yesterday and elected the following directors: George Powelson, Thomas Boardman, D. L. Van Wagonen (re-elected) and Harvey Cluff. These with W. F. Giles, A. L. Booth and Andrew Knudsen, holdovers, will constitute the board of directors. The board will organize with W. F. Giles
